## **DETAILED ACTION**

The claims 1-85 are pending in the instant office action.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-4. Claims 1, 6-33, 71-75 and 84-85, drawn to method of making catalytic antibodies using a covalently reactive transition state antigen (pCRA of formula 1) analog wherein component L in pCRA is in groups 1 amino acid residue, groups 2 sugar residue, groups 3 nucleotide residue and groups 4 fatty acid residue.

Groups 5-8 . Claims 2-5, drawn to a covalently reactive transition state antigen (pCRA) analog wherein component L comprise amino acid residue in groups 5 sugar residue in group 6 so on .

Groups 9-12, claims 34-37, 51-52, drawn to Monoclonal antibodies using pCRA of groups 5-8.

Groups 13-16- claims 38- 50, 53-66, method of making antibodies group 9-12

Groups 17-20- claims 67-68, method of improving catalytic activity of antibody using vectors containing pCRA of group 5-8.

groups 21-24, claims 69-70, drawn to method of passively immunizing a patient by administering a catalytic antibody of groups 5-8.

Groups 25-28- claims 76-78, method of stimulating production of antibodies in a organism administering antigen comprising pCRA of groups 5-8.

Groups 29-32, claims 77-83 drawn to a method of treating a disease state by irreversibly inhibiting the action of a catalytic antibody by administering a pCRA of groups 5-8 to the patient.

The inventions listed in Groups 1-32 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature linking groups 1-32, pCRA antigen, does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as said antigen is taught by Taguchi et al. Biorg med chem. 2002, 12, 3167-3170, from IDS).

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
